KAVITI DANUSH

+91 7794039459 | danushkaviti@gmail.com | LinkedIn | Github | Leetcode | Codechef | Codeforces|Hackerrank

Education

Vignan's Institute of Information Technology Visakhapatnam, Andhra Pradesh

Bachelor of Technology in Computer Science (**2024-2028**) **CGPA-8.45**

Experience

Future Interns — Full Stack Python Web Developer (9th Feb 2026-9th March 2026)

- Built and integrated **RESTful APIs and database operations** to handle user data, authentication, and CRUD functionalities efficiently.
- Designed and implemented **user-friendly frontend components using HTML, CSS, and JavaScript**, while using Git for version control and project management.

Projects

AI-Powered Forensic Face Matching System**- JavaScript, React, Node.js, Hugging Face API, Face Embeddings, CosineSimilarity**

- Developed an AI-powered forensic system that generates **suspect facial sketches from natural-language descriptions** using the Hugging Face Inference API.
- Implemented **face embedding generation and Cosine Similarity** to compare generated sketches with stored suspect images and identify the closest matches.
- Built a full-stack **JavaScript-based application** with a ranked matching workflow to return the **Top-K potential suspects** based on facial similarity.

IP-SAKTI AI **-JavaScript, LangChain, RAG, LLM, Vector Database, Embeddings**

- Developed a domain-specific **IP and regulatory guidance system** for Ayurveda/AYUSH innovators using **Retrieval-Augmented Generation (RAG)**.
- Implemented a **query classification and metadata-aware retrieval layer** to identify product attributes and retrieve more relevant regulatory and IP documents.
- Built a source-grounded LLM pipeline that generates **contextual responses with supporting references** and enables knowledge-base updates without retraining the LLM.

Technical Skills

Languages*:* C, Python, Java, JavaScript, SQL, HTML5, CSS3
Frameworks/Libraries*:* React.js, Node.js, Express.js, Django, Bootstrap, LangChain
AI/GenAI: RAG, LLMs, Embeddings, Vector Databases, Prompt Engineering
Databases*:* MongoDB, SQL
Tools/DevOps: Git, GitHub, VS Code, Postman, AWS, Docker (Basics), CI/CD

Achievements

- **IEEE Vice-Chair and SSC Club Lead** with strong technical leadership experience in college communities.
- Ranked as a **LeetCode Knight** and **CodeChef 3-Star (Peak: 1700),** with 1,700+ problems solved across Codeforces, HackerRank, and CodeStudio.
